

Sevo provides comprehensive on-going, preventive computer and network support.

“Regularly scheduled maintenance and support to maintain a stable and productive computing environment and reduce downtime.”

“We believe every investment has to make a difference to our customers, our operations, and our bottom line. Outsourcing our technology management to Sevo has taken the stress of computer and network maintenance off of our internal staffs and placed in the hands of technology experts. It allows my staffs to do what they do the best, and I can run the practice the way I want”

### Technology Management Solution for Medical Practices

Outsourcing ongoing technology resource management has become more critical than ever to keep the cost down for the medical practices. Outsourcing key operational functions, like information technology, provide access to industry expertise at a lower cost and nearly eliminates the cost of technical training. This ensures optimum capital utilization on business expansion, increase employee productivity, and having expert consultation whenever you need them. Sevo increases a client’s return on its technology investment by meeting that need.

**Every outsourced information technology management program should include these key components:**

- A comprehensive business and technology assessment which provides an overview of current and future needs and creates a strategic technology vision.
- Remote support capabilities to enable faster response and speed to resolution of infrastructure issues.
- Experts support for a wide range of products and technologies.
- A effective process for tracking return on investment, evaluating progress, documenting challenges and developing a plan to achieve technology goals.
- Help Desk assistance for users from operating system support to connectivity issues for maximum productivity.
