

Sevo Procurement Services guide and support client through every stage of IT investment process.

“Always having the right equipments whenever needed is nearly impossible, but when our enterprise switch crashed, Sevo had one ready. It made a world of difference.”

“Finding a technology equipment and vendor that we could trust to recommend products were a challenge to our business. Because our focus is technical not equipment manufacturing. Therefore, we see 100% benefit by partnering with companies are reliable in the industry and determined to pass this benefit to our clients. ”

**Technology Purchasing Power for Your Medical Practice**

Sevo’s procurement services are designed to address the technology acquisition challenges of today’s business. Our clients benefit from enterprise-level purchasing strength by combining buying power of our client base, the technology advices and support of our technology experts, and the flexibility to finance the purchase and installation of technology equipments. This is done through a selective network of strategic partners and financing and leasing companies. The goal of the service is to achieve steeper discounts for clients through the consolidation power of our clients nationwide. We do the work and we pass the benefit to you.

**“We consolidate the purchasing power of our client base to bring the benefits to you.”**

**Expert Advice and Support**

Our network of expert technology consultants is available to aid Sevo clients in technology research and selection process, the coordination of the purchase, and the installation of the new product. All CR consultants can evaluate and purchase:

- Medical Software
- Remote Access
- Application Software
